

## ABSTRACT

There are provided a polycarbonate copolymer (A) which has excellent light resistance and heat resistance and  
5 comprises an aromatic dihydroxy component comprising 5 to 95 mol% of fluorene-skeleton-containing dihydroxy compound (1) having a specific structure and 95 to 5 mol% of ordinary bisphenol type dihydroxy compound (2), the content of  
fluorene-9-one in the copolymer being not higher than 15 ppm;  
10 and a polycarbonate composition comprising 0.01 to 5 parts by weight of ultraviolet absorber (B) based on 100 parts by weight of the copolymer (A), and the composition comprising the copolymer.
